Cough

Audrey Miller, Sunset, LA

I must say that you have a great product. The most recent problem I used it on was when my husband had a dry cough after he had been laid up in the hospital for a whole week. He could not get it loosened up, even after he was given several breathing treatments several times a day. I brought our Q10 to the hospital and just a few hours after I used it on his lung area, front and back, he coughed up a mouthful, the next morning he coughed up some more. After that second time his lungs cleared up and he no longer had the dry cough. Thank again for such a helpful product.
