

Low Level Laser Therapy & Scars testimonials

The laser saved my daughter's hand!!

Earlier this year, my 23 year old daughter burned most of her right hand badly when hot oil started on fire while she was cooking. After she called me early the next morning I brought her into the office where I worked and she did laser treatments before I brought her to Urgent Care. The MD she saw removed dead skin, wrapped the burn and informed us that her hand would scar as it healed.

At a follow up appointment with another MD, we were informed that her hand would scar badly and it was imperative that she treat with a physical therapist while it was healing to retain function of her right (dominant) hand. She continued to do laser treatments over all of the burn areas for the next 10 days.

Amazingly, her hand healed with NO SCARRING whatsoever. Her skin grew back smooth and she has normal, complete FUNCTION of her hand. The only sign there is that she even had a very bad burn is that some areas lack her normal skin pigment.

I wanted her to return to the MD's and Physical Therapist she saw to show them how well it healed, but she refused saying it would be a waste of everyone's time. There is no other explanation for this amazing healing except the laser treatments she had.

I am so grateful that this young lady went off to grad school this fall with 2 functioning, beautiful hands. What a difference the laser treatments have made in her life.

I'd like to share some information with you and whether you publish any or all of it in your newsletter is up to you.

I've owned one of your lasers since 1994. I currently use the Q1000 which I purchased several years ago. I've healed tons of things with them including my cat's third degree burns on her paws from jumping on a hot diesel engine. They were bloody and awful but healed very rapidly with the laser and some oils.

Logan evidently climbed up on the riding lawnmower and fell off, catching his left arm on the exhaust muffler. It burned him pretty badly. Three days after it happened I was able to get a QLaser treatment for Logan from my chiropractor. I am totally amazed at how FAST this wound healed.

days after the accident. T

The pictures are the 1st treatment, 3 days after the accident. The 2nd picture 7 days later. And the last picture is 2 weeks later. **AMAZING !!!!!** Thanks for allowing us to use this marvelous tool...God Bless to you..... Troy Rex
